Course summary

Information security underpins the commercial viability and profitability of enterprises of all sizes and the effectiveness of public sector organisations. This free course begins by explaining why information security and its management are important for any modern organisation and to every individual. You need to be familiar with an organisation, such as your employer, to study this course.

Learning outcomes

By completing this course, the learner should be able to:

- define what information is
- appreciate the value of information to the modern organisation
- understand the CIA triad of Confidentiality, Integrity and Availability
- appreciate the difficulties that arise when valuable information needs to be shared
- identify the five leading-edge resources that have up-to-date information on information security.

Completed study

The learner has completed the following:

Section 1

Information: the heart of everything with value

Section 2

Information security

Section 3

Tracking the leading edge

Section 4

Conclusion
