To Whom It May Concern,

I am writing to provide a reference for Moaz Alnageeb, who has been a dedicated Teaching Assistant (TA) at the School of Computing and Mathematical Sciences, University of Leicester, during the academic years 2022/23 and 2023/24.

Moaz has played a crucial role in the CO1101 Computing Fundamentals module. His primary responsibility was to assist students during their lab sessions. Moaz provided invaluable guidance and support to students, ensuring they had a clear understanding of the module content and could effectively complete their lab exercises. His ability to explain complex concepts in an accessible manner greatly enhanced the learning experience for the students. Moreover, his approachable nature encouraged students to seek help, fostering an environment of active learning and engagement.

In addition to his instructional duties, Moaz also contributed to the overall management of the lab sessions. He was proactive in identifying and addressing common issues faced by students, often developing additional resources or offering extra help sessions to ensure no student was left behind. His commitment to student success was evident in the positive feedback received from the students, who consistently praised his patience, clarity, and willingness to assist. Moaz's contributions have been instrumental in helping students build a strong foundation in computing fundamentals.

Please do not hesitate to contact me if you require any further information.

Sincerely yours,
Ghaith
